## BELLO E QUOTIDIANO / *BEAUTIFUL AND EVERYDAY*

---

*Se dovessi augurarmi un futuro o lo dovessi augurare a mio figlio lo vorrei sereno. Sereno non è felice per forza. Sereno è senza preoccupazioni non necessarie. Che poi alla fine sono solo poche quelle che contano davvero. Sereno è semplice e senza sforzo. Sereno è bello senza complicazioni o sovrastrutture. Sereno è un cielo di Monet e una sedia Bauhaus o una casa sulla cascata di Frank Lloyd Wright. Ma anche uno spremiagrumi di Starck o una tv Brionvega Algol di Zanuso e Sapper. Sereno è meglio di felice perchè dura, bello e pratico è meglio che utile e basta, perchè è nel giornaliero che trova senso la nostra esistenza. Fatta di attimi e gesti e che spesso dimentichiamo nel perseguire grandi progetti, scorrendo che la vita è fatta dai mattoncini del vivere quotidiano. E se non stabiliamo, come tutte le civiltà hanno tentato di fare, che la ricerca del bello è essenziale vivremo nell'approssimazione del provvisorio, solo pratico e senza anima.*

Sebastiano Zanolli

*If I have to wish a future for myself and if I have to wish it upon my son, I would wish for serenity. To be serene is not to necessarily be happy. To be serene is to live without unnecessary worries. Which in the end, only a few of them really count. To be serene is to be simple, without effort. To be serene is beautiful without complications or intricacies. To be serene is a sky by Monet and a chair by Bauhaus or Frank Lloyd Wright's Fallingwater house. Yet also a Starck citrus squeezer or a Brionvega Algol TV by Zanuso and Sapper. Being serene is better than being happy because it lasts, to be beautiful and practical is better than to only be useful, because our existence finds meaning in everyday life. It is made of moments and gestures that we often forget as we pursue greater projects, no longer remembering that life is made of the bricks of everyday life. And if we don't establish, as all civilisations have tried to do, that the quest for beauty is essential, we will live in the approximation of transience, practicality and without soul.*

Sebastiano Zanolli

Parlare di design rispetto alle idee, ai prodotti, a noi stessi, diventa fondamentale se riconosciamo che questo mercato ha più offerta che domanda. Il design, l'estetica, diventano allora un elemento altamente differenziante e soprattutto facile da comprendere. "Design" vuole dire progettazione e indica le azioni di conoscenza, di metodo, e gli strumenti di ricerca ed ideazione finalizzati alla realizzazione di un qualsiasi prodotto o servizio. Ma è ora di comprendere che nella società globalizzata il design diventa un linguaggio universale che supera idiomi e pregiudiziali. È l'apoteosi del pensiero della Bauhaus. Produrre oggetti di design a basso costo perché siano fruibili dalle masse. Tutti ora possiamo e dobbiamo puntare al design per distinguerci dall'indistinguibile. Tenere conto del design in ogni occasione in cui state progettando qualcosa... è un modo per migliorare il mondo a partire dal di fuori, oltre che offrire delle possibilità alle nostre iniziative. Se, come afferma Stefano Zecchi (Ordinario di Estetica presso l'Università degli Studi di Milano) "...la vera sfida è sempre stata quella di gareggiare in bellezza con la natura... costruire cose belle che non offendano il paesaggio...", avere senso ed attenzione per il bello rende il mondo migliore.

**Sebastiano Zanolli**

Io, società a responsabilità illimitata  
Ed. Franco Angeli 2008

To talk about design in terms of ideas, products, ourselves, becomes essential if we recognise that this market has more offer than demand. This is when the design, the aesthetics, becomes a highly differentiating element, and above all easy to understand. "Design" means developing and indicates the actions of knowledge, method and the tools for research and concept aimed at building whatever product or service. But it is now time to understand that in the globalised society design becomes a universal language that goes beyond language and prejudices. It is the apotheosis of Bauhaus's philosophy. To produce low-cost design objects so that they can be available to the masses. Now we all can and must focus on design to distinguish ourselves from the indistinguishable. Taking design into account every time you work on something... is a way of improving the world starting from the outside, in addition to offering possibilities to our initiatives. If, as Stefano Zecchi claims (Professor of Aesthetics at the University of Milan) "...the true challenge has always been to compete with the beauty of nature... to build beautiful things that do not ruin the landscape...", having a sense of and attention to what is beautiful makes the world better.

Sebastiano Zanolli

*A passage from the chapter on design from  
"Io, società a responsabilità illimitata" (Me, an unlimited liability company)*

---

## CHI SIAMO / WHO WE ARE

---

Fresca, giovane, colorata, adattabile, accessibile, ironica, democratica, unconventional ma semplice al tempo stesso: questa è Lineabeta.

Il claim “everyday design” mette l’accento sul percorso che l’azienda ha intrapreso già da qualche tempo, senza soluzione di continuità con gli ultimi trenta anni di storia aziendale: un’idea di ambiente bagno flessibile, comodo e funzionale, dove vivere la quotidianità in modo semplice e spontaneo.

Quelli ritratti nel nuovo catalogo sono luoghi “reali”. Lineabeta è entrata in spazi pubblici e privati, distinti per stile, gusto e funzione, ma sempre strettamente legati alla vita di tutti i giorni.

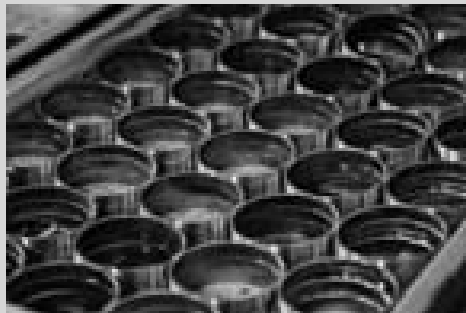

Abbiamo gettato uno sguardo sull’intimità di persone diverse, dall’imprenditore innamorato del classico, al dj eccentrico, all’artista eclettico, alla giovane coppia con bambino, all’illustratrice fantasiosa scoprendo come ciascuno vive il prodotto Lineabeta a proprio modo, reinterpretandolo a volte, per comprendere alla fine che ciascuno nel proprio spazio vuole sentirsi bene, sentirsi a casa.

*Fresh, young, colourful, adaptable, accessible, ironic, democratic, unconventional yet simple at the same time: this is Lineabeta.*

*The claim “everyday design” places the accent on the direction that the company decided to undertake some time ago, all the while staying in line with the last thirty years of the company’s history: the idea of a bathroom that is flexible, comfortable and functional, where you can conduct everyday life simply and spontaneously:*

*The pictures in the catalogue are “real” locations. Lineabeta entered public and private spaces that differ in their style, taste and function, but are all connected to everyday life.*

*We took a peek into the privacy of different people, from the businessman who loves classic design, to the eccentric dj, the eclectic artist, the young couple with a baby; to the imaginative illustrator, discovering how each one lives the Lineabeta product in their own way; sometimes reinterpreting it, to ultimately come to the understanding that each person, in his/her own space, wants to feel good, to feel at home.*

Una quotidianità che perdura da trent'anni. Trent'anni spesi a diventare uno dei primi 5 marchi in Italia nella produzione di accessori e complementi d'arredo per l'ambiente bagno. Trent'anni di tempo, energia, esperienza, innovazione, costanza, creatività, visione, legame col territorio, scelte in linea col mutare dei tempi, acuto spirito imprenditoriale glocal: tanti e tutti fattori necessari per durare e crescere.

Calzante interpretazione della gloCalizzazione di Bauman: i differenti materiali (vetro, ottone, acciaio, ceramica, bambù, mattstone) provengono da un contesto internazionale, vengono lavorati in Italia o all'estero a seconda della competitività delle manifatture e specializzazione delle lavorazioni, ma gli elementi strategici come l'immagine e la creatività del design sono rigorosamente made in Italy, come i nomi delle linee ispirati agli idiomi veneti (Picola, Noanta, Skuara, Venessia, Canavera, Ciacole, Bej, Ciuci...).

Nomi che si traducono in complementi belli e durevoli al giusto prezzo di mercato (globale); una politica premiata anno dopo anno che ha consentito all'azienda di conquistare mercati sempre nuovi.

*Everyday life for the last thirty years. Thirty years spent becoming one of the top 5 brands in Italy for the production of bathroom accessories and furnishings. Thirty years of time, energy, experience, innovation, perseverance, creativity, vision, a connection with the territory; choices that are in keeping with changing times, an acute glocal entrepreneurial spirit: many and all necessary factors to last and grow.*

*A very fitting interpretation of gloCalisation by Bauman: the different materials (glass, brass, steel, ceramic, bamboo, mattstone) come from an international context, processed in Italy or abroad depending on the competitiveness of the processing manufactures and specialisations, but the strategic elements such as the image and the creativity of the design are strictly 'made in Italy', as are the names of the lines inspired by Venetian expressions (Picola, Noanta, Skuara, Venessia, Canavera, Ciacole, Bej, Ciuci...).*

*Names that translate into beautiful and long-lasting accessories at a fair market price (global); a policy that has benefitted the company year after year allowing it to continue to conquer new markets.*

# VENESSIA

---

design **Roy Frame**

Linee eleganti, rigorose, e richiami a un grande passato in ottone cromato: anche la rigidità può accompagnarsi a forme dal sapore antico e ricercato.

*Elegant, precise lines and features from a great past of chrome-plated brass: even precision can be combined with shapes in an old and sophisticated style.*

### CODICE IP (EN 60529) - IP CODE (EN 60529)

Sistema che indica i gradi di protezione di un involucro contro l'accesso a parti pericolose, la penetrazione di corpi solidi, e/o l'ingresso di acqua.  
*A coding system to indicate the degree of protection provided by an enclosure against accessing of solid foreign objects and/or water.*

### PROTEZIONE CONTRO L'INGRESSO DI SOLIDI / PROTECTION AGAINST THE INGRESS OF SOLIDS

IP0X non protetto / *not protected*  
IP1X contro corpi estranei > 50 mm / *against solid foreign objects > 50 mm*  
IP2X contro corpi estranei > 12 mm / *against solid foreign objects > 12 mm*  
IP3X contro corpi estranei > 2,5 mm / *against solid foreign objects > 2,5 mm*  
IP4X contro corpi estranei > 1 mm / *against solid foreign objects > 1 mm*  
IP5X protezione da polvere / *dust protected*  
IP6X stagno alla polvere / *dust-tight*

### PROTEZIONE CONTRO L'INGRESSO DI LIQUIDI / PROTECTION AGAINST THE INGRESS OF LIQUIDS

IPX0 non protetto / *not protected*  
IPX1 contro la caduta vertical di gocce / *against vertically dripping*  
IPX2 contro caduta acqua con inclinazione 15° / *against 15° tilted dripping*  
IPX3 contro la pioggia / *rain protected*  
IPX4 contro gli spruzzi / *splashing protected*  
IPX5 contro i getti acqua / *jetting protected*  
IPX6 contro i getti potenti / *powerful jetting protected*  
IPX7 contro l'immersione temporanea / *against temporary immersion*  
IPX8 contro l'immersione continua / *against continuous immersion*

### CERTIFICAZIONI / CERTIFICATES

TUV Rheinland GS è un certificato fornito dal produttore che attesta l'ammissione in Europa. Dimostrando la totale conformità con GPSG (legge tedesca sulla sicurezza del prodotto) per la Germania, ma anche dimostra la conformità con l'LVD, legge dell' unione europea che assicura che un apparecchio elettrico con certi limiti di voltaggio, offre comunque un alto livello di protezione.

*The TUV Rheinland GS is a certificate presented by manufacturers as the proof for acceptance into Europe. It demonstrates full compliance with the GPSG (German equipment safety law) for Germany; but it also demonstrates compliance to the LVD that ensures that electrical equipment within certain voltage limits provides a high level of protection in the*

### CLASSI DI ISOLAMENTO / CLASS LUMINAIRES

#### CLASSE I

La protezione non si basa unicamente sull'isolamento principale, ma anche su una misura di sicurezza supplementare costituita dalla connessione delle parti conduttrici accessibili ad un conduttore di protezione (messa a terra di protezione) che fa capo all'impianto elettrico fisso, in modo tale che le parti conduttrici accessibili non possano andare in tensione in caso di guasto dell'isolamento principale.

*Provide protection against electrical shock solely using the base insulation and the safe connection of all exposed conductive parts to an earth conductor.*

#### CLASSE II

Gli apparecchi di classe II sono progettati in modo da non richiedere la connessione di messa a terra. Sono costruiti in modo che un singolo guasto non possa causare il contatto con tensioni pericolose da parte dell'utilizzatore. Ciò è ottenuto realizzando l'involucro del contenitore in materiali isolanti, o comunque facendo in modo che le parti in tensione siano circondate da un doppio strato di materiale isolante o usando isolamenti rinforzati.

*Provide protection against electrical shock using both the base insulation and an additional or reinforced insulation. This kind of products do not feature a connection to a protective earth conductor.*

#### CLASSE III

Un apparecchio viene definito di Classe III quando la protezione contro la folgorazione si affida al fatto che non sono presenti tensioni superiori alla Bassissima tensione di sicurezza SELV (Safety Extra-Low Voltage). In pratica tale apparecchio viene alimentato o da una batteria o da un trasformatore SELV.

*Luminaires provide protection against electrical shock by using Safety Extra Low Voltage (SELV). This kind of products are not permitted to generate higher voltages than the Safety Extra Low Voltage.*

### NORMATIVE TECNICHE / NORMATIVE NOTES

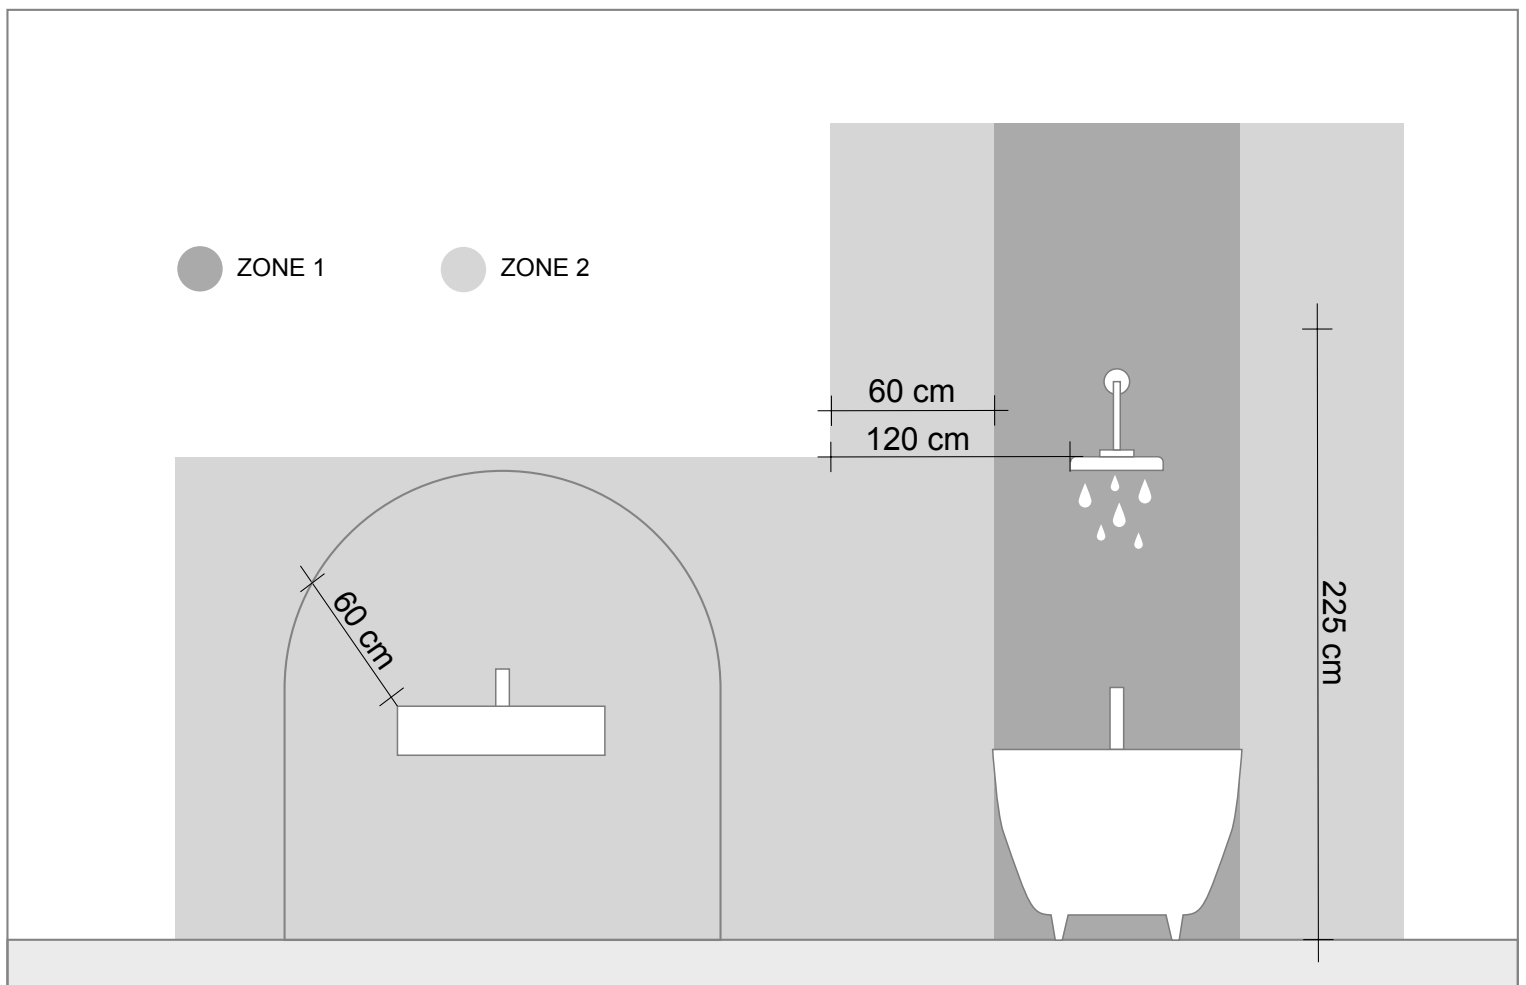

Le direttive 89/336/CEE e 73/23/CEE stabiliscono i requisiti essenziali di sicurezza e compatibilità elettromagnetica a cui devono rispondere i materiali elettrici per poter circolare liberamente all'interno del mercato Europeo. Questi requisiti devono essere verificati mediante opportune prove tecniche e la conformità del materiale deve essere indicata mediante l'apposizione del marchio CE sul prodotto o sul suo imballo. La marchiatura è obbligatoria ed il produttore è direttamente responsabile della rispondenza del prodotto ai requisiti essenziali delle direttive sopracitate. La vendita, la commercializzazione e l'acquisto di prodotti privi della marcatura, e quindi non rispondenti alle direttive, è punita a termini di legge.

*The directives 89/336/EEC and 73/23/EEC establish the essential requirements for safety and electromagnetic compatibility that the electric and electronic equipment shall comply for freely circulating in the European market. These requirements must be verified by appropriate tests and compliance of the material must be indicated by the CE marking on the product or its packaging. This marking is mandatory and the producer is directly responsible for product compliance with the essential requirements of the abovementioned Directives. The sale, marketing and purchase of products without the markup, and therefore not meet the guidelines, shall be punished by law.*

## ZONE DI SICUREZZA / SAFETY ZONES

Tutti gli apparecchi elettrici vanno collegati al circuito mantenendo una distanza minima di 0,60 m da lavabi, cabine doccia, vasche e 1,20 m da soffioni doccia.

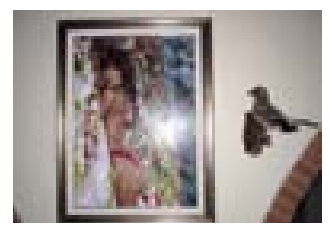

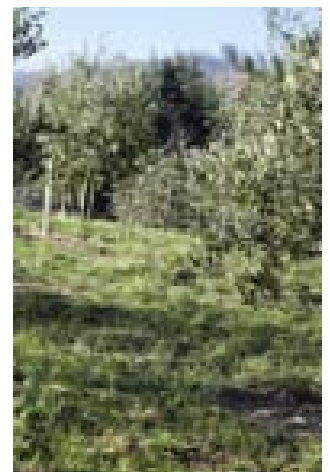

*Electric appliances must be wired to the electric circuit in a minimum distance of 0,60 m from shower cabins, bath tubs, washbasins and of 1,20 m from shower heads.*
